

Marine Acme
Thai Dockyard
Co.,Ltd

Our Business line / Service

Ship repair , Conversion from single to double hull, Tank coating,

Marine Acme Thai Dockyard (MAT) is located in Chaopraya River, Samutprakarn Province, Thailand.

MAT provide floating dock for every kind of vessels up to 8,000 dead weights tons.

All kind of international standard services for normal docking tasks, can be well performed such as:

-Hull cleaning, fresh water wash down, high pressure water cleaning at 300 bar, 500 bar, 800 bar and approximately 60° C high pressure water for cargo tank, sand blasting and painting.

Cargo tank coating for tankers and cargo hold coating for general cargo vessels.

-Overhaul valves, cargo valves for gas carrier and tanker.

-Hull & Structure renewal based on IACS classification standard.

-Service fix pitch propeller, CPP system, tail shaft and bush renewal.

-UTG, NDT and testing with calibration service

Superior machinery and electrical system repair are provided such as: main/auxiliary engine, boiler/condenser and piping/fitting repairs etc.

In addition, afloat repair can be taken place anywhere in Chaopraya River and Leam Chabang, Chonburi Province etc. Due to standard portable equipment and machinery (portable generator set, air compressor, welding machine, supply boat).

Our Management

Lt. Mathiwut Mungthin RTN
Managing Director

Lt. Mathiwut Mungthin RTN founded Marine Acme Thai Dockyard Co.,Ltd. in 2003.

He earned his Bachelor degree in Marine Engineering from Naval Academy school , Thailand. and continued his Master degree of Mechanical Engineering from Northrop University, USA. He had 8 years of working experience at ESSO (Thailand) Public Co.,Ltd. and over 12 years in Marine industry both in government and private sections.

The highlight of his career was the floating dock " Lawan 2 "building, our MAT's pride. The docking size 126x32 meter with lifting capacity up to 5,500 tons was designed and built in Thailand and ready to operate within only 9 month period.
